RE: APPRECIATION OF AEA PATCHING VELOCITY TECHNOLOGY DURING DEMOS & TRIALS ON MOI SOUTH LAKE ROAD, NAIVASHA.

On 15th February 2016, AEA Limited carried out a demonstration of their AEA Patching Road Repair Solution, where they managed to repair **4 Potholes** on **Moi South Lake Road**, spaced on a stretch of 10km within 30 minutes.

We would like to take this opportunity to show our appreciation of AEA Limited for organizing for the exercise. Being a faster alternative to Conventional Pothole Patching as well as extremely Traffic-friendly and Cost Effective, adopting this technology will greatly improve the efficiency of Road Repair & Maintenance around the country and we would happily recommend its use.

Yours faithfully,

For: **KENYA ELECTRICITY GENERATING COMPANY LIMITED**
