**TO WHOM IT MAY CONCERN,**

**REF: APPRECIATION OF AEA PATCHING VELOCITY TECHNOLOGY DURING DEMOS & TRIALS  
IN YOUR COUNTY**

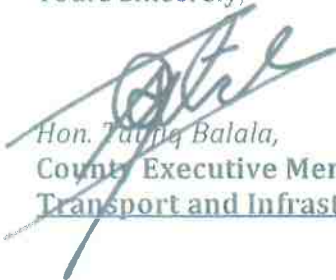

AEA Limited (formerly known as Avery East Africa Limited) is a pan African, Kenyan based, company that has been in the market for more than 46 years.

In partnership with Velocity Patching UK Limited, AEA Limited launched AEA Patching, a Road Repair Solution, in Kenya earlier this year in February. The technology offers a unique road preservation solution approach by carrying out fast and efficient repairs that take, on average, less than three minutes per pothole using a new and innovative cold asphalt-based technology.

On 15<sup>th</sup> February 2016, AEA Limited carried out a demonstration of their AEA Patching Road Repair Solution, where they managed to repair **22 Potholes on Moi South Lake Road** within **one** hour.

We would like to take this opportunity to show our appreciation of AEA Limited for organizing for the exercise. Being a faster alternative to Conventional Pothole Patching as well as extremely Traffic-friendly and Cost Effective, adopting this technology will greatly improve the efficiency of Road Repair & Maintenance around the country and we would happily recommend its use.

Yours Sincerely,

Hon. Tatifa Balala,  
County Executive Member  
Transport and Infrastructure.
