RE: Product Evaluation – Velocity Patching

Dear Mr. Mathew:

Thank you for submitting this product to South Carolina Department of Transportation (SCDOT) for evaluation for potential use. Velocity Patching is a cold applied asphalt emulsion for spray injection patching. Based on our review of the information submitted and product performance, this product is approved for use by SCDOT.

This approval does not obligate SCDOT to use or specify the product. SCDOT will revoke approval of this product if it should fail to perform as specified or if the product varies from the specification as originally submitted. You must resubmit a request for approval for use in South Carolina, if Velocity Patching is altered or redesigned.

Sincerely,

James A. Johannemann, P.E.
Assistant State Maintenance Engineer
